SOLAR DISPLAY SYSTEMS

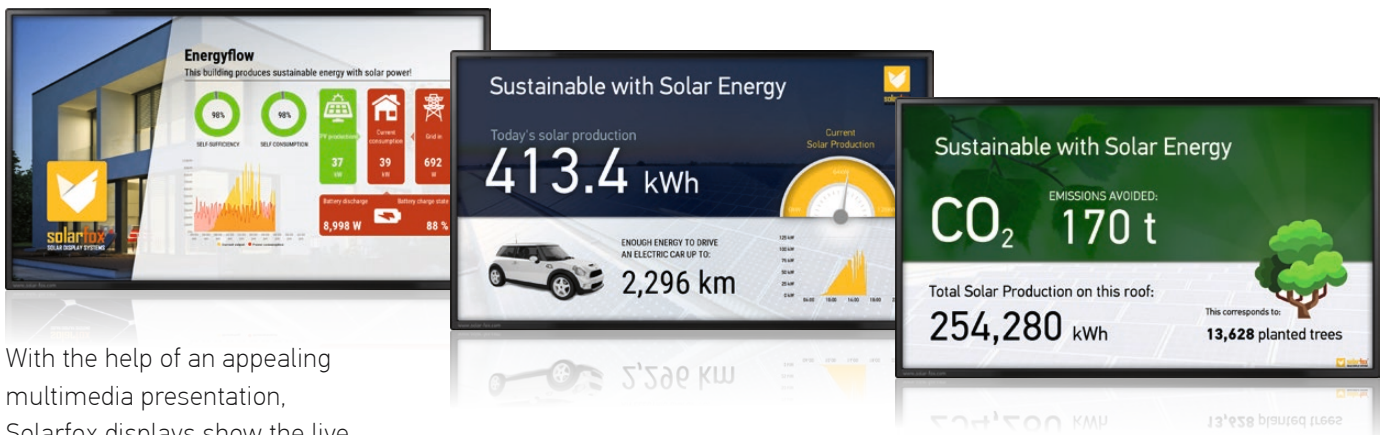

Do you have a photovoltaic system or are you planning to build a solar power system?

A PV system on a roof is often flat and invisible to visitors. But who can know about it? The investments in sustainability are often not used for marketing and image!

The good news:

A Solarfox® display at the entrance solves this problem ideally and helps you to express your commitment in an impressive way. Your perfect image ambassador!

With the help of an appealing multimedia presentation, Solarfox displays show the live data from your roof!

ALL-IN-ONE

Flexible and versatile usage

Solar displays from Solarfox® not only visualise renewable energies and CO₂ avoidance, but are also an “innovative bulletin board” for all kinds of content, that offer a wide variety of built in tools to integrate your information.

Compatibility with almost every system

Solarfox® works with over 70 manufacturers of inverters and systems for renewable energy and are constantly expanding.

Individual customisation

All content can be fully adapted to your own specifications, layouts, logos, colours, etc. In particular, you can display your own images, videos, PDFs and Office files.

Locational independence

An internet connection is all that is required on site. The data and content can be visualised independently of the location of the PV System and changed at any time.

Visualisation of multiple PV Systems

You can visualise several systems at the same time on one display. The systems can be shown individually or collectively.

Popular in many application areas - More than 10,000 installations

The areas of application of Solarfox® displays are diverse. Our systems are already in use in more than 10,000 public and commercial properties worldwide. Solarfox® is ideal for:

- Companies
- Retail
- Municipalities
- Universities
- Craft shops
- Gas stations
- Schools
- Associations
- Car dealerships
- Energy suppliers
- Kindergardens
- Clubs

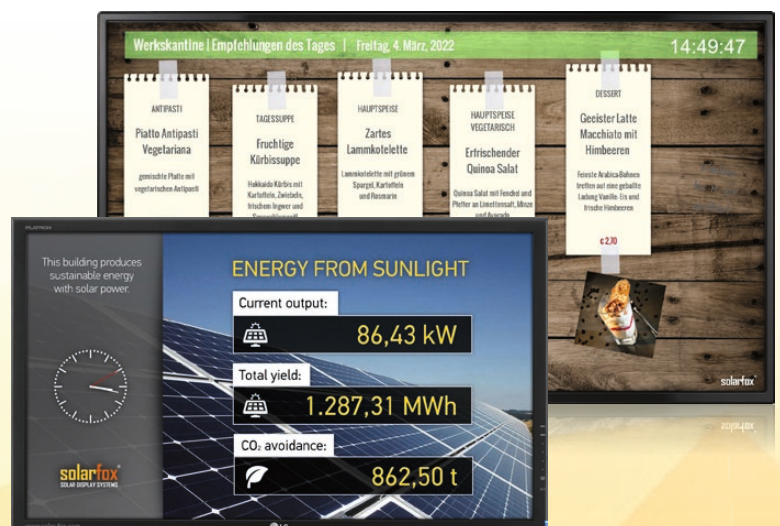

A Solar display and an innovative bulletin board

Solarfox® displays can, not only visualise energy production, but can also be used as an innovative bulletin board. You can display your own text and images with just a few mouse clicks. You can easily make the settings in our online administration via web browser. An internet connection is all that is needed.

With the help of the Foxdesigner you can also create your own content and presentations in a very convenient way. Whether for animations, external HTML pages, logos, etc., operation is child's play and can be done from anywhere. In no time, the solar display becomes an innovative bulletin board for all kinds of information.

Solarfox® displays provide live data from your roof!

Easy and flexible data communication

Photovoltaic system

Inverter

DSL-Router
(LAN/ WIFI)

Internet/ Cloud

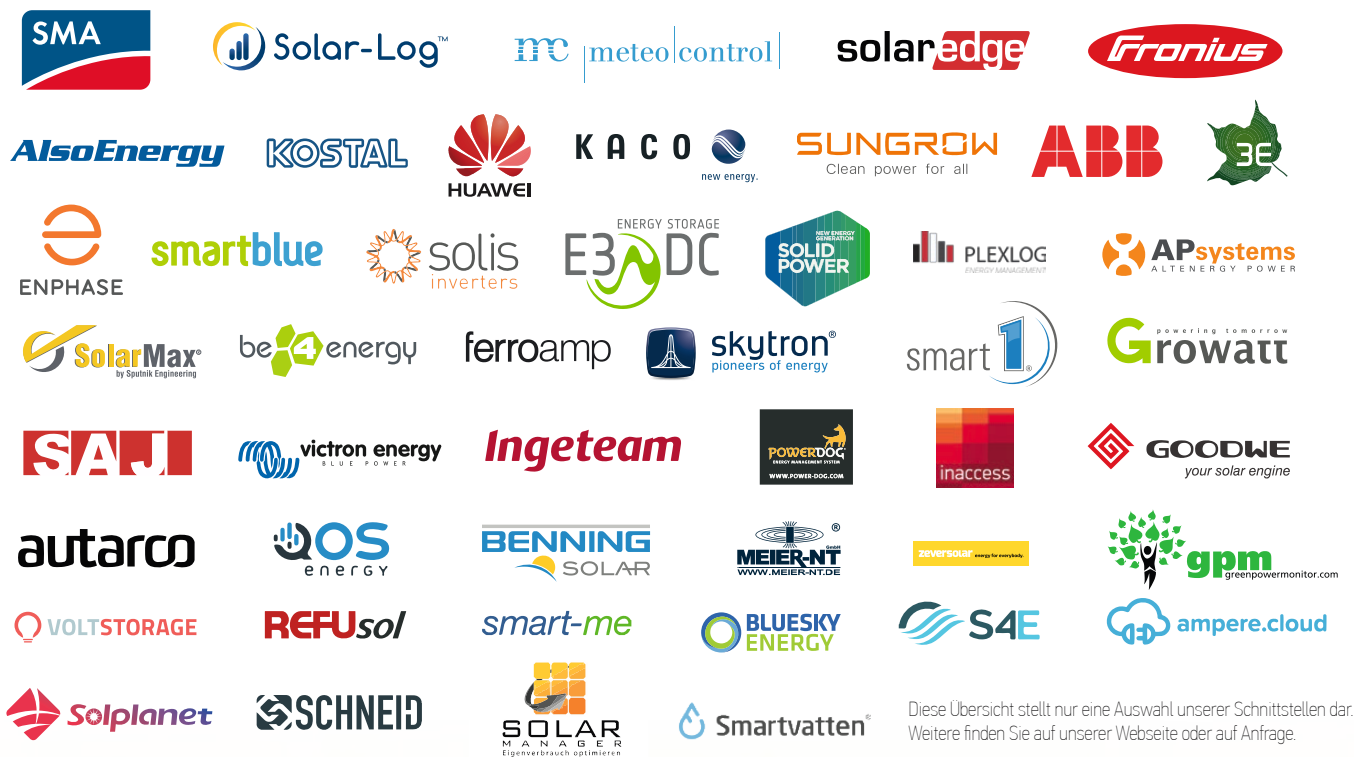

Solarfox® Display

Convenient data exchange via the Cloud

Solarfox® displays can be connected to almost any photovoltaic system with a datalogger or monitoring system. Data communication takes place via the Internet and thus offers a very high degree of locational independence. The advantage of this technique is that no direct wiring is required for the connection between the photovoltaic system and the display. This allows you to be especially flexible when choosing an installation site.

ONE-FOR-ALL

Compatibility with almost all systems
